

RESISTOR SET - high power. set / 7

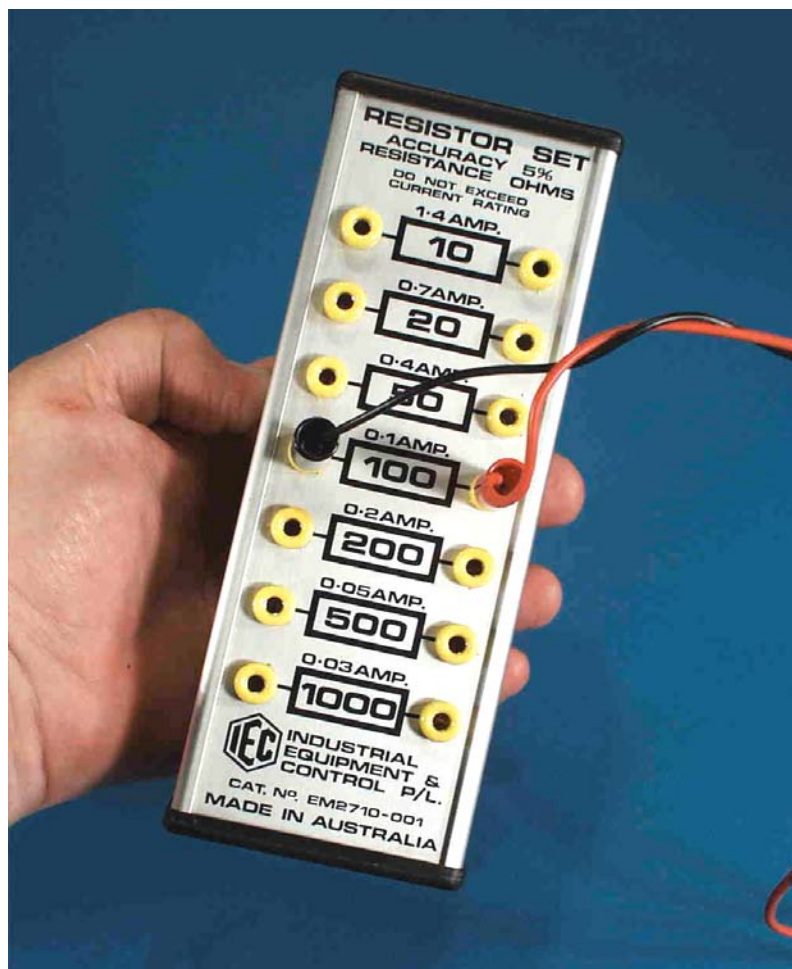

EM2710-001 5% accuracy

DESCRIPTION: Seven high power resistors are mounted in a robust ventilated enclosure and each is individually terminated to 4mm banana sockets. The resistors can be interconnected and connected into circuits directly with 4mm banana plugs.

The 7x resistance values are:

10 ohm 20 watt, 20 ohm 10 watt, 50 ohm 10 watt,
100 ohm 5 watt, 200 ohm 2 watt, 500 ohm 2 watt, 1000 ohm 1 watt.

EM2710-001 resistor set / 7– high power

Physical size: 195x72x60mm LxWxH

Weight: 0.32 kg

ACCURACY: within +/- 5% of marked value.

POWER: 12 volts can be applied to any resistor without overloading or damaging the resistor. The maximum permissible current for each resistor is marked on the front panel.

Designed and manufactured in Australia
